

Intergalactic Maths

Amazing Fact

A year on Venus is shorter than a day. Venus takes only 224 days to make a complete orbit of the Sun, but 243 days to make one complete turn on its axis.

Challenge

Solve the planetary maths puzzles provided.

You could also try to find out:

- which planet spins most quickly on its axis;
- which planet has the longest 'year';
- what else is unusual about Venus.

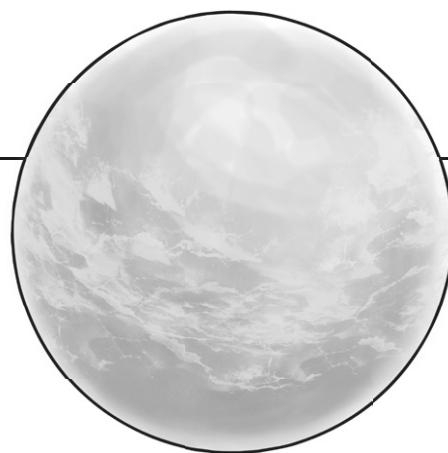

Intergalactic Maths

Amazing Fact

A year on Venus is shorter than a day. Venus takes only 224 days to make a complete orbit of the Sun, but 243 days to make one complete turn on its axis.

Challenge

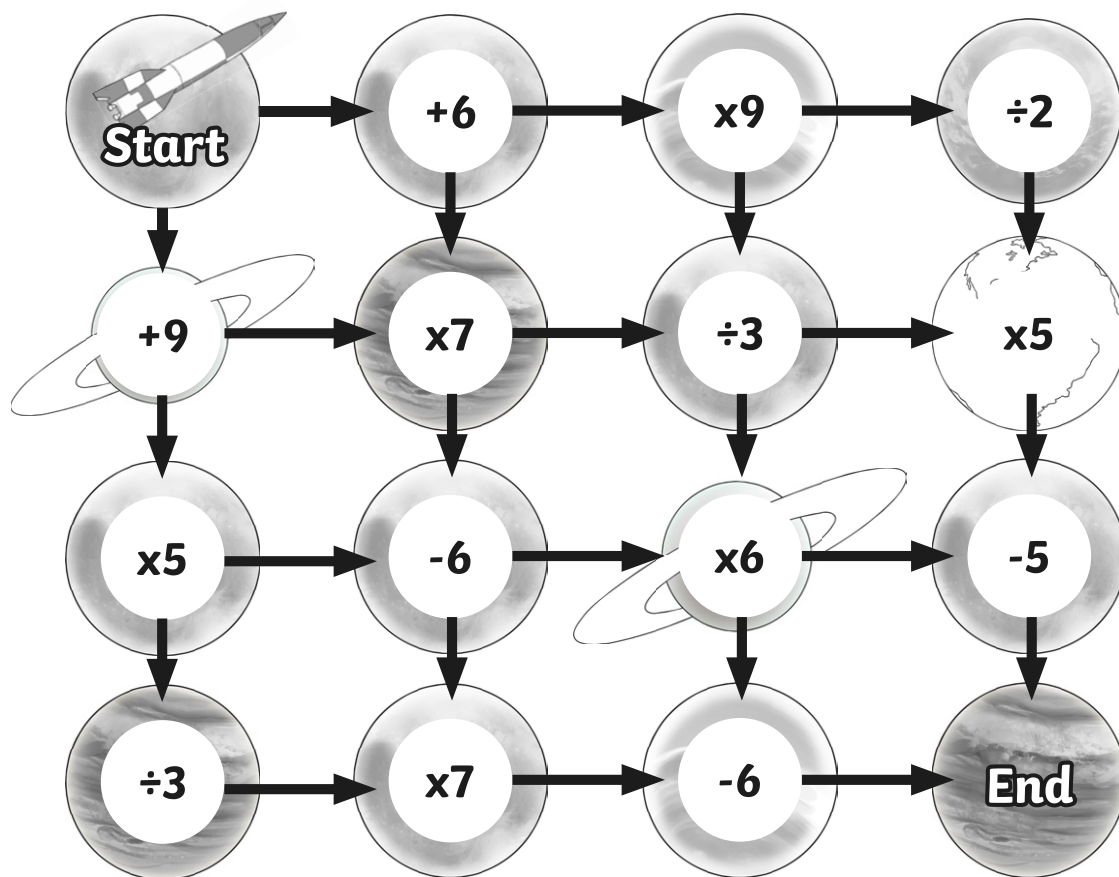

Solve the planetary maths puzzles provided.

You could also try to find out:

- which planet spins most quickly on its axis;
- which planet has the longest 'year';
- what else is unusual about Venus.

Solve the puzzles below. Start with 0 and find the route that totals to 100.

Try and make a total of 1000 by landing on 4 planets.
